UNITED STATES BANKRUPTCY COURT  
CENTRAL DISTRICT OF CALIFORNIA

In re

OAK PARK CALABASAS CONDOMINIUM  
ASSOCIATION,

Debtor.

Case No. SV 02-17038-GM

Chapter No. 11

MEMORANDUM OF OPINION ON  
CONFIRMATION OF DEBTOR'S PLAN  
[11 U.S.C. §1129(a)(7)]

Date: July 9, 2003  
Time: 10:00 A.M.  
Place: Courtroom 303

182 p. 2/1

I. <u>INTRODUCTION</u> . . . . .	1

d. <u>Amount Available</u> . . . . .	15
III. <u>OTHER ISSUES</u> . . . . .	18

1 The Debtor, a condominium homeowner association, seeks to confirm  
2 a Plan over the rejection of its principal creditor, who holds a  
3 California Superior Court judgment now on appeal. The Plan proposes to  
4 pay the final judgment in full at the federal judgment interest rate of  
5 1.82% over of period of 20 years, rather than at the California judgment  
6 interest rate of 10%. Because of the uncertainties in this case and the  
7 interest rate provided for in the Plan, I cannot find by a preponderance  
8 of the evidence that there is a reasonable possibility that the creditor  
9 will receive at least as much under the Plan as it would on the  
10 effective date if this case were in Chapter 7. Therefore, the Plan does  
11 not meet the requirements of 11 U.S.C. § 1129(a)(7) and cannot be  
12 confirmed.

#### 13 14 I. INTRODUCTION

15 Oak Park Calabasas Condominium Association (the "Debtor" or "HOA")  
16 is a California public benefit corporation formed in compliance with  
17 California Civil Code Section 1363(a)<sup>1</sup>, which requires a common interest  
18 development to be managed by an association. As a homeowner  
19 association, the HOA is regulated by the Davis-Stirling Common Interest  
20 Development Act ("Davis-Stirling Act"), which is set forth in California  
21 Civil Code Sections 1350-1376. The Davis-Stirling Act, which was  
22 amended thirty-nine times between 1987 and 1998<sup>3</sup> with still more  
23 amendments since then, differs substantially from the Uniform  
24 Condominium Act, thereby limiting my use of cases from other  
25

---

26 <sup>1</sup> This opinion refers to the California Civil Code concerning the formation, rights and responsibilities of the  
27 Homeowner Association; the California Code of Civil Procedure as to collection of judgments; and to the Bankruptcy Code (set  
forth in 11 U.S.C. § 101, et. seq.). For each citation, all references will be to 11 U.S.C. § 101, et. seq., unless otherwise specified.

28 <sup>3</sup> Katharine N. Rosenberry & Curtis G. Sproul, A Comparison of California Common Interest Development Law and  
the Uniform Common Interest Ownership Act, 38 Santa Clara L. Rev. 1009, 1010 (1998).

1 jurisdictions.

2 After the Oak Park Calabasas Condominium complex was damaged in the  
3 1994 Northridge earthquake, the Debtor contracted with ECC Construction,  
4 Inc. ("ECC") to conduct earthquake repairs. Disputes arose between the  
5 HOA and ECC, which resulted in ECC filing suit against the HOA and its  
6 members in California Superior Court. On August 5, 2002, after a six-  
7 month jury trial, a judgment was entered against the HOA and in favor  
8 of ECC for \$7,154,544.70 (as amended), including damages for breach of  
9 contract, fraud, failure to pay retention, punitive damages, attorneys'  
10 fees, and costs. This judgment is on appeal to the California Court of  
11 Appeal. Prior to this bankruptcy, the Superior Court determined that  
12 the individual homeowners were not liable for ECC's claims and that ECC  
13 had not properly perfected its mechanic's liens against the homeowners'  
14 units.

15 The Debtor's disclosure statement, which I approved over the  
16 objection of ECC, puts the members of the HOA in Class 7 and divides  
17 the creditor classes as follows: Class 1, the secured claim of TC  
18 Investments for an SBA loan; Class 2, the secured mechanic's lien of A/C  
19 Care, Inc.; Class 3 (of which there are no members), unsecured priority  
20 claims; Class 4, the disputed unsecured claim of ECC; Class 5, a  
21 convenience class of creditors holding claims of under \$1,000; and Class  
22 6, all other unsecured claims. All classes, except Class 5, are  
23 impaired. All classes except Class 3 (containing no members) and Class  
24 4 (ECC) have voted to accept their treatment under the Plan. In prior  
25 hearings I have ruled on all issues, including ECC's assertion of  
26 improper classification, except whether the Plan: (1) meets the "best  
27 interest of creditors test" as set forth in § 1129(a)(7)(A); (2) is  
28 "fair and equitable" under § 1129(b)(2)(B); (3) is "proposed in good

1 faith" as required by § 1129(a)(3); and (4) is feasible as described in  
2 § 1129(a)(11).

3  
4 **II. "BEST INTEREST OF CREDITORS" RULE - 11 U.S.C. § 1129(a)(7)**

5 Section 1129(a)(7)(A) requires that a holder of a claim who has not  
6 accepted the plan must

7 (1) receive or retain property under the plan, which has a value  
8 on the effective date

9 (2) which is at least as much as the holder would receive or retain  
10 if the debtor were liquidated under chapter 7 on the plan's effective  
11 date.

12 Because 11 U.S.C. § 102(5) states that "'or' is not exclusive,"  
13 I need to determine not only the amount that ECC would receive through  
14 the Plan or from a chapter 7 trustee, but the present value as of the  
15 effective date of any remaining right to execute on its judgment. As  
16 set forth below, the Debtor is not able to show by preponderance of the  
17 evidence that there is at least a reasonable possibility that the Plan  
18 will comply with the requirements of § 1129(a)(7).<sup>4</sup>

19  
20 **A. The Value on the Effective Date of What ECC Will Receive or**  
21 **Retain Under the Plan**

22 A trial court judgment on appeal is "final" in California for  
23 purposes of execution, but is still subject to increase, decrease,  
24 affirmation, reversal or remand. This creates substantial uncertainty  
25 as to how much the HOA will have to pay ECC to satisfy the judgment, but  
26

27 <sup>4</sup> I have found no case on point as to the standard to be used when the plan contains substantial uncertainties, so am  
28 adopting the one stated in United Savings Assn. of Texas v. Timbers of Inwood Forest Assoc., Ltd., 484 U.S. 365, 375-6, 108  
S.Ct. 626, 633 (1988), which requires a reasonable possibility of a successful reorganization and is more beneficial to the Debtor  
than demanding probable success.

1 for purposes of this opinion, the amount of the amended judgment  
2 (\$7,154,544.70) will be used.

3 The Plan proposes to pay ECC 100% of its claim, plus interest of  
4 1.82% (the federal judgment interest rate as of August 6, 2002, which  
5 was the week that the judgment was entered), through a supplemental  
6 assessment on all homeowners that will be deposited in a sinking fund  
7 for ECC's benefit. At the conclusion of all state court litigation  
8 affixing ECC's claim, the monies in the sinking fund will be transferred  
9 to ECC. Thereafter, ECC will receive \$107,000 per quarter through  
10 January 1, 2024. The Plan also provides "supplemental payments,"  
11 defined as the annual amounts (up to \$50,000 per year) necessary to make  
12 sure that ECC is paid the full amount of its judgment at 1.82% interest  
13 over the life of the Plan. ECC will have a security interest in and  
14 receive the proceeds from any third-party litigation. Any judgment  
15 balance will be paid by January 31, 2024. This is a maximum payment  
16 stream (exclusive of any third party recovery and without any deduction  
17 for costs) of \$8,652,612.42, which would pay off the entire judgment at  
18 1.82% interest on April 1, 2022.<sup>5</sup>

19 Based on the Supplemental Declaration of Bruce Ballenger, the  
20 appropriate discount rate for the Plan's stream of payments is 9.25% and  
21 for a court-supervised collect of the judgment is 10.5%; ECC has put  
22 forth no contrary evidence. Thus, the net present value of the proposed  
23 Plan payments to ECC (exclusive of third party recoveries and costs) is  
24 \$4,766,719.03, based on a judgment of \$7,154,545. Since nothing more  
25 would be owing to ECC under the Plan, this is the maximum that it would  
26

---

27 <sup>5</sup> The calculation spreadsheets are in the Court's file as "Calculations Concerning Debtor's Plan." One of the difficulties  
28 in the calculations is that the date and amount of the ultimate judgment is not yet known. For purposes of this opinion, the  
maximum supplemental payment of \$50,000 per year is used, which would pay off the current judgment at 1.82% interest 21  
months before the end of the proposed Plan.

1 receive or retain as of the effective date.

2  
3 **B. The Value that ECC Would Receive or Retain if the Debtor Were**  
4 **Liquidated Under Chapter 7 on the Effective Date**

5 **1. Recoveries from the Estate**

6 In Exhibit "A" of the disclosure statement, the Debtor lists the  
7 following six assets:

- 8 1. Cash assets - \$1,007,933;  
9 2. Golf cart - \$1,000.00;  
10 3. Office equipment - \$1,000.00;  
11 4. Pre-paid legal expenses - \$257,500.00;  
12 5. Pre-paid insurance - \$39,362.00; and  
13 6. Third-party litigation proceeds - Unknown.

14 The most recent financial statement, provided at the April 21, 2003  
15 hearing, showed cash assets of \$769,761. It appears that this is a  
16 rolling number and I assume that the cash assets are a combination of  
17 assessments and reserve funds, whose use may be limited by law.

18 The third party litigation proceeds are uncertain at best. The  
19 Debtor has just filed suit against State Farm Insurance and it is  
20 anticipated that it will take years before that matter is concluded.  
21 At this point even the Debtor cannot estimate the value of the third  
22 party litigation, which also includes pre-petition claims against a  
23 variety of former directors, professionals and individuals. ECC  
24 questions the viability of these actions. As proposed in the Plan, if  
25 there is a recovery from the third party litigation, the net proceeds  
26 will be subject to ECC's lien. I have no evidence to allow me to value  
27 these third party claims as of the effective date or even to anticipate  
28 whether a chapter 7 trustee might pursue them, sell them to an outsider

1 or to the defendants in those actions, abandon them, or transfer them  
2 to ECC for an agreed amount or a setoff against the judgment.

3 Assuming that all assets that could be liquidated were sold by the  
4 trustee, ECC would only receive its prorata share in priority order.  
5 The disclosure statement shows about \$250,000 in chapter 11  
6 administrative claims, \$24,000 in unsecured claims (exclusive of that  
7 of ECC), and a secured SBA loan, which will affect the amount of  
8 available cash. Chapter 7 administrative expenses will also eat into  
9 the distribution. Thus the ECC distribution under chapter 7 would  
10 undoubtedly be substantially less than \$500,000, leaving ECC with a  
11 large, unsatisfied judgment. For purposes of calculation, however, ECC  
12 will not be given "credit" for monies that it might receive from a  
13 trustee, which benefits the Debtor in my comparison of present value  
14 received or retained by ECC from a hypothetical chapter 7.

## 16 **2. The Value of What ECC Would Retain After Liquidation**

17 While the current assets would be liquidated and distributed by the  
18 chapter 7 trustee, future monies collected from the homeowners are not  
19 property of the estate, but they are subject to execution by ECC.

### 21 **a. Power of the HOA Board to Assess**

22 It is the interaction of the power of the HOA board to assess and  
23 the limitations of that power which creates one of the two major issues  
24 of statutory interpretation in this case. Another is the power of the  
25 court to override the assessment limitations of the board.

26 The HOA is required to comply with the provisions of the Davis-  
27 Stirling Act. Each common interest development must be managed by a  
28 community association, which is required to prepare a budget and conduct

1 meetings in a particular manner.<sup>6</sup> Association funds are to be  
2 maintained in certain types of financial institutions, must be accounted  
3 for in specified ways, and cannot be commingled.<sup>7</sup> Unless otherwise  
4 provided in the declaration of the development, the association is  
5 responsible for "repairing, replacing, or maintaining the common areas"  
6 and for levying assessments on the members "sufficient to perform its  
7 obligations under the governing documents" and under the Davis-Stirling  
8 Act.<sup>8</sup>

9 There are three types of assessments that the homeowner association  
10 can make: regular assessments, special assessments, and reserve  
11 assessments. Regular assessments are "to defray expenses attributable  
12 to the ownership, operation and furnishing of common interests by the  
13 Association;"<sup>9</sup> special assessments are for "capital expenditures (as  
14 distinguished from assessments to pay ordinary operating expenses);"<sup>10</sup>  
15 and reserves may only be spent for the "repair, restoration,  
16 replacement, or maintenance of, or litigation involving the repair,  
17 restoration, replacement, or maintenance of, major components which the  
18 association is obligated to repair, restore, replace, or maintain and  
19 for which the reserve fund was established."<sup>11</sup>

20 While the assessments can be increased in an unlimited amount if  
21

---

22 <sup>6</sup> Cal. Civ. Code § 1363 (West 2003).

23 <sup>7</sup> Id. § 1363.2.

24 <sup>8</sup> Id. §§ 1364 (a), 1366(a).

25 <sup>9</sup> Cal. Code Regs. Admin. tit. 10, § 2792.16 (2003).

26 <sup>10</sup> In Critical Assessment: The Financial Role of Community Associations, James L. Winokur defines a "special  
27 assessment" as a "single assessment for the purpose of discharging a capital or extraordinary expense." The special assessment  
28 can be payable in more than one payment. 38 Santa Clara L. Rev. 1135, 1170 (1998).

<sup>11</sup> Cal. Civ. Code § 1365.5(c)(1).

1 the homeowners agree (so long as the money collected is used as  
2 described above), absent that consent the board may enhance the annual  
3 regular assessment in an amount "no more that 20 percent greater than  
4 the regular assessment for the association's preceding fiscal year," and  
5 it may not "impose special assessments which in the aggregate exceed 5  
6 percent of the budgeted gross expenses of the association for that  
7 fiscal year."<sup>12</sup> In this case the homeowners have agreed to the special  
8 assessment proposed in the Plan both by vote at a special meeting and  
9 by the acceptance of Class 7.

10  
11 **b. Using Court Process to Collect**

12 The assessment limitation can be overridden for an emergency  
13 situation. The term "emergency situation" has only three definitions  
14 in the Davis-Stirling Act, each of which starts with "[a]n extraordinary  
15 expense."<sup>13</sup> ECC relies on the first definition, which states that an  
16 emergency situation includes, "[a]n extraordinary expense required by  
17 an order of a court." The other two provisions clearly relate to health  
18 and safety issues: (1) to repair and maintain "where a threat to  
19 personal safety on the property is discovered;" (2) to repair and  
20 maintain something the board could not reasonably have foreseen at the  
21 time of the budgeting process. In context, it appears that the "order  
22 of the court" also should be limited to health or safety issues or where  
23 the board must act but there is inadequate time to obtain the quorum to  
24 pass an assessment in excess of a 20% increase. But the recent  
25 legislative history indicates that interpretation of an "order of the  
26

---

27 <sup>12</sup> Id. § 1366(b).

28 <sup>13</sup> Id.

1 court" is broader than that.

2 When a creditor obtains a large judgment against a homeowner  
3 association, unless the parties agree to a payment plan, the judgment  
4 creditor may ask the court to appoint a receiver or make some other  
5 order in aid of collection. Using a receiver in aid of execution is  
6 expensive and should be done "cautiously and only where less onerous  
7 remedies would be inadequate or unavailable."<sup>14</sup> Although the receiver  
8 is an agent of the judgment creditor rather than an officer of the  
9 court, the appointment is made by judicial discretion and the receiver  
10 continues under the direction and control of the court.<sup>15</sup>

11 The actions of the receiver in Simi Valley Le Parc H.O.A. v. ZM  
12 Corp. ("Le Parc")<sup>16</sup> triggered legislation to prevent unlimited  
13 collections in payment of a judgment against a homeowner association.  
14 After the Le Parc bankruptcy case was dismissed due to the inability  
15 to confirm a plan, the Superior Court ordered the association board to  
16 levy an emergency assessment to satisfy the judgment and appointed a  
17 receiver to collect the development's regular and special assessments.  
18 Eight months later, the county health inspector closed the swimming pool  
19 and there were threatened utility shutdowns. Some homeowners lost their  
20 homes to foreclosure because they could not pay the assessment, while  
21 the value of other homes declined and the assessed value of the complex  
22 dropped dramatically. As a result of this draconian collection method,  
23

---

24 <sup>14</sup> Morand v. Super. Ct. of the City and County of San Francisco, 38 Cal. App. 3d 347, 351 (Cal. App. 3 Dist. 1974).

25 <sup>15</sup> Id. at 350.

26 <sup>16</sup> Ventura County Super. Ct. Case No. CIV 159037. The facts of Le Parc in the Bankruptcy Court are available in the  
27 records of Central District of California Case No. SV 97-20190. The assertions of the actions taken after dismissal of the  
28 bankruptcy case come from AB 1859 Assembly Bill Analysis for the Assembly Committee on Housing and Community  
Development for hearing on April 26, 2000. The Order for the homeowner association to specially assess for the ZM judgment  
was filed with this Court on April 4, 2003 as an exhibit to ECC's objections to the Plan confirmation in this case.

1 the legislature amended the statute to provide a set of exemptions for  
2 regular assessments "only to the extent necessary for the association  
3 to perform essential services, such as paying for utilities and  
4 insurance."<sup>17</sup> However, the original suggestion by Assembly Member  
5 McClintock that Cal. Civ. Code § 1366(b)(1) be amended to read "[a]n  
6 extraordinary repair or maintenance expense that arises from an order  
7 of a court" was withdrawn and this provision continues with no  
8 limitation to repair or maintenance items.

9 The legislative reaction to the receiver's methods in Le Parc  
10 demonstrates an intent that collection against future assessments by a  
11 homeowner association should be reviewed and monitored by the court to  
12 make sure that there is a balance between the right of the creditor to  
13 collect and the needs of the homeowners. For the court to allow a  
14 receiver or commissioner to squeeze every cent out of the property  
15 without providing for required maintenance would conflict with this  
16 obligation.

17 How the Superior Court might supervise collection of a large  
18 judgment against a homeowner association was demonstrated by Judge  
19 Richard B. Wolfe of the Superior Court, who issued an extensive draft  
20 memorandum of opinion on May 8, 2003 (the substance of which he later  
21 adopted in his ruling) in the case of Klipa v. James F. O'Toole Co.,  
22 Inc.<sup>18</sup> Though Judge Wolfe's decision is not binding on me, his  
23 thoughtful analysis is of great assistance for it indicates the value  
24 of what ECC would retain as a judgment creditor seeking to collect its  
25 judgment through the Superior Court.

---

26  
27 <sup>17</sup> Cal. Civ. Code § 1366(c).

28 <sup>18</sup> Los Angeles Super. Ct. Case No. LC050749.

1 In Klipa, the judgment creditor sought a court order that the  
2 homeowner association assign all or a part of its monthly assessments  
3 directly to the creditor and further that the court require the  
4 association to levy an emergency assessment sufficient to satisfy the  
5 judgment. First Judge Wolfe found no barrier to an order assigning  
6 assessment proceeds to the judgment creditor and then he determined that  
7 Civ. Code § 1366(b)(1) allowed the homeowner association to levy an  
8 emergency assessment to satisfy an order of the court and that a  
9 judgment against the association "is, in and of itself, an 'emergency'  
10 expense." Because a judgment is an 'order of court,' it, "by  
11 definition, constitutes an 'extraordinary expense.'"<sup>19</sup>

12 Finding no guidance in the statute for setting the proper amount  
13 of an assessment,<sup>20</sup> Judge Wolfe asserted that there are two policies that  
14 need to be considered and enforced: the right and power of the  
15 association to govern itself and the legal obligation of the association  
16 to pay judgments against it. To that end, Judge Wolfe ordered the  
17 association to convene a homeowner's meeting to "provide for a  
18 meaningful emergency assessment so as to satisfy the outstanding  
19 judgment in favor of judgment creditor."<sup>21</sup> While he did not set an amount  
20 or time frame for payment and he noted that the court should defer to  
21 the board's authority and presumed expertise as stated in Lamden v.  
22 LaJolla Shores Condominium Homeowner Assn.,<sup>22</sup> he required the homeowners  
23 to act in good faith (such as not providing a dollar a year).  
24

---

25 <sup>19</sup> Id. at 26-27 (emphasis deleted).

26 <sup>20</sup> Id. at 11-12.

27 <sup>21</sup> Id. at 32.

28 <sup>22</sup> 21 Cal. 4th 249, 265 (Cal. 1999).

1 Thus it appears likely that the Superior Court would order the HOA  
2 to propose an emergency assessment to satisfy the judgment and hold the  
3 board (and perhaps the members) in contempt if they failed to provide  
4 such a proposal. Presumably if the court felt that the proposal was not  
5 in good faith, it could order yet another proposal and so on until the  
6 HOA presented one that the court could accept. or the judge could make  
7 an assignment order or appoint a receiver or commissioner.<sup>23</sup>  
8

9 **c. The Maximum Amount to Which ECC is Entitled**

10 ECC's treatment under the Plan is an attempt by the Debtor to use  
11 the bankruptcy process to convert a state judgment into a federal one  
12 and thereby repay it at a lower rate of interest. I could find no case  
13 discussing the effect of § 1129(a)(7) when the debtor is not entitled  
14 to a discharge under chapter 7 either because it is not an individual<sup>24</sup>  
15 or because it owes a non-dischargeable debt.<sup>25</sup> Further, the cases  
16 dealing with the post-petition interest rate focus on solvent debtors.

17 For example, the recent Ninth Circuit opinion in In re Cardelucci<sup>26</sup>  
18 deals with the federal versus state interest rate issue, but its holding  
19 is specifically limited to the hypothetical distribution by a trustee  
20 in a solvent chapter 7 case and it never discusses the issue or effect  
21  
22  
23

---

24 <sup>23</sup> Kenneth M. Miller and Kathleen M. DeLaney, Can Judgments Against Homeowner Associations Nab Homeowners?,  
25 Cal. Litig., J. Litig. Sec., Cal. State Bar, Vol. 15, No. 1 (2002). It is interesting to note that the appointment of a receiver is not  
26 mentioned as an effective tool in this article; however the authors do discuss the appointment of a commissioner under Cal. Civ.  
Proc. § 187 to carry out the statutory duties of the corporation's officers in order to levy and collect a special assessment.

27 <sup>24</sup> § 727 (a) (1).

28 <sup>25</sup> The cases dealing with non-dischargeable tax debt do not rely on § 1129(a)(7).

<sup>26</sup> 285 F.3d 1231 (9th Cir. 2002), *cert. denied*, 537 U.S. 1072 (2002).

1 of a possible discharge in chapter 7.<sup>27</sup> Cardelucci interprets the  
2 language of § 726(a)(5) that requires interest to be paid creditors of  
3 a solvent chapter 7 estate "at the legal rate from the date of filing  
4 of the petition..." to specifically mean that the federal interest rate  
5 for judgments must be used, even if a creditor received a state court  
6 judgment prior to bankruptcy. The Court of Appeals - relying on the  
7 policy statement in In re Beguelin<sup>28</sup> - found that "the interests of  
8 'fairness, equality, and predictability in the distribution of interest  
9 on the creditors' claims' as well as the interest in applying federal  
10 law to federal bankruptcy cases, required application of the federal  
11 judgment rate approach."<sup>29</sup> And although this might lead to inequitable  
12 results in some situations, the language in § 726(a)(5) requiring  
13 "'interest at the legal rate'" (emphasis added) "is a statutory term  
14 with a definitive meaning that cannot shift depending on the interests  
15 invoked by the specific factual circumstances before the court."<sup>30</sup>

16 The holding in Cardelucci limits the application of judicial  
17 discretion to prevent a detriment to a creditor or a windfall to the  
18 debtor, but only if the debtor is solvent. The limitation does not  
19 exist in the present case since §726(a)(5) does not apply to the HOA's  
20 Plan and §1129(a)(7) does not have any equivalent language to that  
21 section. Thus, to determine the applicable rate of interest, I need to  
22 look at the underlying policies of the Bankruptcy Code itself rather  
23

---

24 <sup>27</sup> The confirmed plan in Cardelucci provides that the confirmation order will act as a discharge of that debtor. And  
25 although it is possible that the state court judgment obtained by the objecting creditor in that case may have qualified as a non-  
26 dischargeable debt under § 523(a)(6), no adversary proceeding was ever filed. See In re Cardelucci, United States Bankruptcy  
27 Court for the Central District of California, Case SA 98-14797 RA.

28 <sup>28</sup> 220 B.R. 94, 100 (9th Cir. B.A.P. 1998).

29 <sup>29</sup> Cardelucci, 285 F.3d at 1234.

30 <sup>30</sup> Id. at 1236.

1 than only those of § 726(a)(5).

2 Various policies exist (and to some extent conflict) in the  
3 bankruptcy law, but the two main goals are (1) to "provide a collective  
4 forum for sorting out the rights of the various claimants against assets  
5 of a debtor where there are not enough assets to go around" and (2) to  
6 provide "for some sort of financial fresh start for certain debtors."<sup>31</sup>  
7 As part of this policy, non-individuals are treated less generously in  
8 chapter 7 than are human beings, who are allowed to transfer their non-  
9 exempt property to a trustee and walk away from all debts except those  
10 specifically designated as non-dischargeable under § 523(a). Thus the  
11 right to collect the debt from a non-individual trumps the fresh start  
12 of that entity.

13 This need to balance the right of the creditor to collect against  
14 the right of the debtor to obtain a clean slate is an integral part of  
15 the decision of whether to provide interest and at what rate. "It is  
16 manifest that the touchstone of each decision on allowance of interest  
17 in bankruptcy, receivership and reorganization has been a balance of  
18 equities between creditor and creditor or between creditors and the  
19 debtor."<sup>32</sup>

20 While § 726(a)(5) is an attempt to treat pre-judgment and post-  
21 judgment creditors the same when distributing the assets of the estate  
22 and to prevent an administrative nightmare for the chapter 7 trustee,<sup>33</sup>  
23

26 The Nature of Bankruptcy, 89 U. Pa. L. Rev. 1, 3-4 (1940) and Elizabeth Warren, Bankruptcy Policy, 54 U. Chi. L. Rev. 775,  
27 785 (1987).

28 <sup>32</sup> Vanston Bondholders Protective Committee v. Green, 329 U.S. 156, 165, 67 S.Ct. 237, 241 (1946), *rehearing denied*,  
329 U.S. 833, 67 S.Ct. 497 (1947). Some of the holdings of this case were superceded by the Bankruptcy Act of 1978, but the  
general statement of policy contained therein continues as guidance.

<sup>33</sup> Cardelucci, 285 F.3d at 1235-6.

1 once those assets have been distributed and no discharge is possible,  
2 the bankruptcy court has no further interest in limiting the action of  
3 the creditors whose debts are still unpaid. The debtor should not  
4 receive the benefits conferred by discharge when no discharge is  
5 permitted.

6 In general, chapter 7 results in the liquidation of non-individual  
7 debtors since there are no exemptions to allow them to maintain assets  
8 or other property.<sup>34</sup> In most cases this means that no debtor entity  
9 would remain from which ECC could collect. But a homeowner association  
10 is unique, since California law requires that it continue to exist and  
11 collect monies from the homeowners and that only a portion of those  
12 amounts are exempt from execution. Therefore a homeowner association  
13 would survive chapter 7 and so would its liabilities, including this  
14 judgment, which would continue to accrue interest at 10%.<sup>35</sup>

#### 16 d. Amount Available

17 Significant problems arise in dealing with the rights of the  
18 parties when there is a large judgment against the HOA. As noted by  
19 Judge Wolfe, while the Davis-Stirling Act creates some safeguards to the  
20 HOA and gives the court some powers, it does not describe a well-defined  
21 collection program.

22 Whether collected by emergency assessment, special assessment,  
23

---

24 <sup>34</sup> § 522(b).

25 <sup>35</sup> Though McClellan v. Northridge Park Townhome Owners Assn., Inc., 89 Cal. App. 4th 746 (Cal. App. 2 Dist. 2001),  
26 review denied (2001), never deals with the necessity of a homeowner association – finding on the facts that the new entity was  
27 a mere continuation of the prior homeowner association – some entity must comply with the Davis-Stirling Act and do all the same  
28 things as the original homeowner association. Since the HOA cannot be liquidated and it or its alter ego must continue to operate,  
there will be a source of repayment for creditors even after the trustee administers and distributes all assets of the estate. This  
leads to a different result than In re General Teamsters Warehousemen and Helpers Union, Local 890, 265 F.3d 869 (9th Cir.  
2001), where the future union dues was not seen as an asset because the union could later cease to exist.

1 execution or receiver, there is a maximum amount of money that is  
2 available to pay toward this judgment at any given point in time and  
3 still provide for the safety and maintenance of the property. It can  
4 be expected that this amount will shift due to the decreased value of  
5 the dollar as inflation occurs (so more dollars can be assessed since  
6 they are worth less) and the need for large outlays as the complex ages,  
7 there are natural disasters, or other unforeseen circumstances occur (so  
8 that a larger segment of the assessments will have to be committed to  
9 maintenance and repair of the property). I do not have the luxury of  
10 dealing with events as they occur but, if possible, must make a decision  
11 based on the present situation and interpolate what might happen over  
12 the years in order to determine the present value of what ECC would  
13 receive or retain as of the effective date.

14       The parties agree that of the \$721,908 budgeted as a regular  
15 assessment for 2003, \$545,268 is "essential" as that term is used in  
16 Civ. Code § 1366(c), and therefore exempt from execution. Of the  
17 remaining \$176,640, \$120,000 is for legal costs, which presumably will  
18 not continue at that rate into the future. The \$56,640 balance either  
19 covers services that the association feels it can do without (i.e.,  
20 gardening extras) or that individual homeowners will provide (i.e.,  
21 pool/spa services).

22       Beyond the regular assessment, there is an additional sum of  
23 approximately \$428,000 that the homeowners and management believe can  
24 be collected each year by special assessment without negatively  
25 impacting the value of the property or the individual homeowners. Thus,  
26 beginning in 2004, the HOA can collect \$600,424 per year beyond the  
27 essential portion of the regular assessment and the ongoing special  
28 assessment for the SBA. It is not unreasonable to assume that if there

1 were no bankruptcy, the Superior Court would require the HOA to collect  
2 and pay at least this much to ECC. Excluding any payment that ECC might  
3 receive from the trustee if the case were in chapter 7, this would  
4 result in the payment over 20 years of \$12,060,000, with a net present  
5 value of \$5,282,555 for the 20 year stream of payments. At the end of  
6 20 years, ECC would be owed almost \$12 million more. If it properly  
7 renews the judgment, ECC can continue to enforce it until it is paid in  
8 full, with each renewal adding unpaid interest to the principal amount.<sup>36</sup>

9 While a \$12 million judgment in 2024 will not be worth what it is  
10 in 2003, it still would have substantial value, particularly since it  
11 can't be discharged in bankruptcy and will be supported by a stream of  
12 payments into the future. Of course, ongoing court supervision will  
13 mean that payments go up (to overcome the negative amortization factor)  
14 or down (to deal with emergencies). But I do not need to find the exact  
15 value of what ECC retains, for under any scenario ECC does not receive  
16 or retain under the Plan as much as it would under a chapter 7  
17 liquidation.

18 While this means that I cannot confirm this Plan, it does not  
19 suggest that no plan can be confirmed just because it covers a long  
20 period of time or contains some uncertainty as to future events. But  
21 it is clear that a confirmable plan must provide for full payment of  
22 ECC's claim with 10% interest and with accrued and unpaid interest being  
23 added to the principal every 10 years.

24 When that Plan is proposed, the parties may wish to consider the  
25 following:

26 (1) Since the HOA acknowledges that it can collect at least  
27 \$30,000 per month without interfering with its responsibilities - that

---

28 <sup>36</sup> Cal. Civ. Proc. Code §§ 683.020, 683.110, 683.120, 683.150, 685.010 (West 2002).

1 being the amount of the nonessential services and the emergency  
2 assessment - the Superior Court would require that initially the Debtor  
3 must pay ECC at least that much.

4 (2) The Plan proposed by the Debtor need not pay off the judgment  
5 at the identical rate as the Superior Court would order, but the  
6 judgment must be paid off in full (calculated at 10% accruing interest)  
7 by the end of the Plan. Further the length of the Plan should not  
8 exceed 20 years from the end of all appeals.

9 (3) Given the length of the Plan, some mechanism for changes in  
10 payment amount must be built into the repayment process unless the  
11 proposed payments completely amortize the judgment over the life of the  
12 Plan without any need to determine later increases in payments or to pay  
13 off a balloon at the end.

14 (4) Rather than waiting for years to ascertain the viability and  
15 value of the third party actions, the parties might wish to consider  
16 some form of estimation. In determining the best interest test, I need  
17 only find the likely result, not the definite one.

### 18 19 III. OTHER ISSUES

20 The remaining issues of good faith (§ 1129(a)(3)), the fair and  
21 equitable test (§ 1129 (b)(2)(B)), and feasibility (§ 1129(a)(11)) need  
22 not be resolved at this time. Should the Debtor propose a Plan which  
23 conforms with § 1129(a)(7), I will look at each of these issues (and any  
24 new ones raised by the proposed Plan).
